

Please continue to regulate broadband. The service I receive from my independent ISP, Sonic, is so much better than anything I experience with the large, international providers. When I call Sonic, I don't get a recording telling me that my call is important to them. A human being answers and stays with me until the problem is solved. Sonic has solved my junk mail problem. They are local. They are my neighbors. Don't allow them to be driven out of business by the Bells, etc!
